

# MILTEX HI-LIGHT

## DENLITE ILLUMINATED MIRROR

The DenLite Illuminated Mirror System is designed to give Dental Professionals a shadow-free view of the mouth during routine dental exams. It provides Dental Professionals with a bright white light, which eliminates the need for constant adjustment of cumbersome overhead lights during everyday procedures. The DenLite system is the only cordless, illuminated dental instrument that can be used as a mirror while also being strong enough to be also used as a retractor during an examination.

In May of 2006 the DenLite Illuminated Mirror System, designed by Welch Allyn, won the prestigious Medical Design Excellence Award. This award is presented by Cannon Communications LLC (Los Angeles) and is the only awards program that exclusively recognizes contributions and advancements in the design of medical products.

DP5000

### KEY PRODUCT FEATURES & BENEFITS

#### Features

One-watt LED Light .....	Provides shadow and glare free illumination
Cordless Illuminated System .....	Portable unit, can be used to provide light in any environment
Lightweight System .....	Reduces hand and wrist fatigue
Disposable mirrors used with the system .....	Eliminates the risk of cross-contamination between patients
DenLite disassembles for Sterilization .....	Increases infection control protection for patients
Fully re-charged batteries should last 45 minutes .....	Light should last for the entire procedure prior to needing to be recharged
Optional autoclaveable transilluminator tip .....	Provides white light on both sides of the tightly focused, heat-free mirror head.
	Makes it equally light for detection of cracks and caries
Miltex has an extensive line of Dental Mouth Mirrors .....	Meets the needs of any Dental Professional
